SYSTEM3<sup>SDP</sup>

## Introducing System 3<sup>SDP</sup>

Easy Application. Unrivalled Safety.

**Patent Pending Formula**

Antimicrobial, water-based technology is merciless on bacteria and viruses but exceptionally gentle on skin

Green, environmentally friendly formula is completely food safe and welcome everywhere people gather

Incredibly versatile, and simple to apply via spray, dip, wipe (towelettes), and fogging

Less likely to stain, or discolor treated surfaces than competitive products

### Comfort by Design

*System 3's unique combination of exceptional strength and ultra-safe chemistry delivers unsurpassed protection and unparalleled peace of mind.*

### SYST3 SYSTEM 3SDP

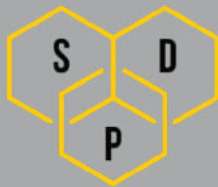

- Sanitize, Disinfects and Protects up to 120 days.
- 62% ethyl alcohol content
- Ready to use on any surface
- Easily applied by spraying, wiping, fogging, or electrostatic sprayer
- Pending EPA approval

**\$59.95 per gallon**

**\$219.95 per case**

**(4 gallons per case)**

**55-gallon drums and 275-gallon totes available upon request!**

# SYSTEM3<sup>SDP</sup>

Scientifically Superior Surface Protection

## SYST3 SYSTEM 3SDP

The data results were based on sampling using a 3M Clean-Trace system, utilizing ATP testing technology.

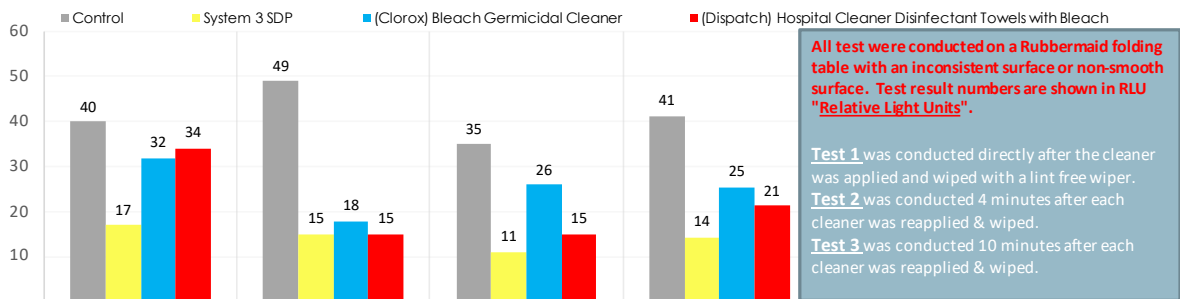

Microbes and product residue contain Adenosine Triphosphate (ATP), an indicator of biological residues that can be easily detected to measure cleanliness quickly. Unlike other methods, ATP testing is rapid, sensitive, quantitative and simple.

To measure ATP using the 3M™ Clean-Trace™ System, a collected sample is mixed with luciferase, an enzyme from fireflies, which catalyzes a reaction. The energy from this reaction creates light that's proportional to the amount of ATP in the sample — the more light detected, the dirtier the surface tested.
