AIR-COOLED RUBBER BACKUP PADS

FEATURES:

- Designed for medium to heavy grinding applications.
- Slotted aluminum hub design draws cool air behind the disc.
- Curved ribs on the rubber face force heat away from the disc and backup pad.
- Cooler cutting action reduces disc loading and increases grinding life.
- All pads have a 5/8"-11 threaded female hub for mounting. Medium pads offer great flexibility; hard pads provide more aggressive cut.
- Use with NORTON discs to maximize cut and life.
